

G-FORCE FLAP DISCS

- Designed to fit most right angle grinders. Provide fast stock removal and consistent finish
- They are safe, quiet, efficient, easy to use and low cost as compare to grinding wheel and sanding disc

A11 Aluminum Oxide for **General Purpose** application. Can be used on ferrous and/or non-ferrous metals such as iron, steel, aluminum, brass, copper, zinc, plastic, fiberglass and wood.

A11
General Purpose
Aluminum Oxide

Z10 Zirconia for **General Purpose** application. Its performance is more aggressive than the A11 A/O and provides significant effect in term of grinding hard alloy steel and stainless steel.

Z10
General Purpose
Zirconia

- Zirconia Alumina Grain provides faster cutting, long working life for hard to grind materials
- Excellent for Stainless Steel and Steel
- Suitable for various heavy duty grinding applications

Z25 Zirconia Alumina - **Industrial Grade** disc made with premium zirconia on a durable polyester-cotton backing. Provides high stock removal and long life on a wide variety of ferrous metals and hard to grind materials.

Z31
High Performance
Zirconia - Germany

Grade	Abrasive Grain	Description and Application
A11	Aluminum Oxide	General purpose. Can be used on ferrous and non-ferrous materials
Z10	Zirconia	General purpose (more aggressive than A11)
Z25	Premium Zirconia	Industrial grade, providing high stock removal and long life. Coated abrasive cloth is made in Korea
Z31	Premium Zirconia	High performance and long life. Providing superior grinding and finishing capability on a variety of materials. Coated abrasive cloth is made in Europe
